INDEX OF BIOTECH COMPANIES INVESTED IN BY VC FIRMS..... 83

## FOREWORD

BioAbility, a world leader in providing strategic business information in biotechnology and the life sciences, has developed a database of Asia Pacific venture capital (VC) firms that invest in biotechnology companies. The information from that database is presented here as a user-friendly directory. This is the first edition of the *Asia Pacific Biotechnology VC Directory*.

BioAbility researched the Asia Pacific venture capital community via commercial databases, surveys, analysis of websites, country-specific venture capital associations, and direct contact with the firms. VC firms believed to be involved in biotechnology investment have been included in this directory. Firms that indicated a willingness to invest in biotechnology were included, even if none of their past investments have been in biotechnology. In some cases, these firms have multiple physical locations (sites), which are also included in this directory. This directory contains the following:

- 241 VC sites of 101 VC firms
- 472 contact names

Please note that the definition of investing in “biotechnology” is taken very broadly and was self-defined by the venture capital firms when they were submitting information. Another criterion for inclusion was that the firm typically has a site in the Asia Pacific region, but does not have to be headquartered there. Thus, some of the firms in this directory have headquarters in the U.S. or Europe. Contact information for the headquarters location has been included for comprehensiveness.

Biotechnology portfolios were determined for most of the 101 firms in this directory. Information on companies these firms invested in is presented with each VC firm in the main section of this directory. When available, the biotechnology portfolio is historical, containing not only active investments, but also biotechnology companies invested in previously, some of which are no longer in business. Further, an index of 565 biotechnology companies detailing their VC investors is presented at the end of this directory. The biotechnology companies listed may be located anywhere in the world. Also presented are an overall index of venture capital firms, an index of contact names, an index of areas of focus, and a listing of venture capital firm sites by country, further segmented by city.

Note that some websites may not be able to be viewed by all web browsers. English-language versions of most of the websites are available. However, a few sites were only in Chinese and were directly translated for inclusion. We found that many faxes to Asia Pacific firms failed on one attempt, but were successful on a subsequent attempt. Fax transmission failure was typically due to problems such as all circuits being busy or poor line condition.

Because Hong Kong is a special administrative region of China and maintains a degree of autonomy, it has been treated as a separate country for the purposes of this directory. The country names used in this directory are the widely recognized short forms of the names; for example, Singapore is used instead of Republic of Singapore.

BioAbility has made every effort to compile data that is up-to-date and accurate. To help ensure accuracy, we requested feedback from each VC firm listed herein on the information we had collected. Firms were contacted up to three times, or as necessary, in order to verify accuracy. In cases where faxes were not transmitted successfully, we contacted the firms by email or telephone. However, not all VC firms responded, and not all firms update their online information regularly. Further, despite our efforts to be up-to-date, with over 470 contacts listed in this directory, it is likely that at any point, some will change position or change their contact information.

### **Location of Asia Pacific Biotech VC Sites**

In the Asia Pacific region, we identified the largest number of VC firms investing in biotechnology in China. For their size, both Singapore and Hong Kong stand out. These are both financial hubs, and Singapore in particular has worked to attract the biotech industry. In addition to the 221 sites distributed in the Asia Pacific region as shown below, this directory includes 17 sites in the U.S., two in the UK, and one in Germany. Those sites are included because they are the headquarters locations for firms that invest in, and typically have offices in, the Asia Pacific region.

#### **Asia Pacific VC Sites by Country**

<b>Country</b>	<b>Count</b>
Australia	14
China	57
Hong Kong	21
India	34
Indonesia	1
Japan	21
Malaysia	8
New Zealand	9
Pakistan	1
Philippines	1
Singapore	27
South Korea	9
Taiwan	15
Thailand	2
Vietnam	1

#### **Asia Pacific VC Sites by Country Rank**

<b>Rank</b>	<b>Country</b>	<b>Count</b>
1	China	57
2	India	34
3	Singapore	27
4	Hong Kong	21
4	Japan	21
6	Taiwan	15
7	Australia	14
8	New Zealand	9
8	South Korea	9
10	Malaysia	8
11	Thailand	2
12	Indonesia	1
12	Pakistan	1
12	Philippines	1
12	Vietnam	1

### **Acknowledgements**

This directory was created by BioAbility and published by BioWorld. Data collection and verification were undertaken by Mark Chang, with assistance by Chengsi Huang and Jessica Lunsford. Data collection was facilitated by the Mandarin fluency of both Chang and Huang. The directory was edited by Melanie C. Trull with support from Tracey V. du Laney, Neal R. Clegg and Victoria W. Smith. This project was managed by BioAbility's president, Mark D. Dibner.
