

Table of Contents

Introduction – Med-tech innovation continues but may be heading overseas.	1
Akron planning for seed fund to lure biomedical companies	3
ArthroSurface develops HemiCAP BIO implant	5
Brown University researchers create nanopatch for the heart	7
CHAMPION results bolster CardioMEMS wireless sensor	9
CardiOx aims for funding, approval for new PFO test	11
Artificial heart maker Carmat meets manufacturing milestone	13
Catheter Connections launches new infection-control device.	15
Checkpoint’s neurostimulation device launched nationwide	17
ChipDX develops online cancer diagnostics tool	19
ConforMIS launches its biocompartmental system	21
CorMatrix ECM shows potential to reduce new onset post-op AF.	23
Trial to evaluate CorPath robotic system for PCI	25
C Port offers up solution to connect patients, clinicians	27
Ekos wins \$2.7M NIH grant for ICH treatment device.	29
EndoLumina eyes wireless sensing of upper GI bleeding.	31
Robodoc gains steam with total hip implant for patient	33
EBR moves forward with WiCS clinical trial	35
Researchers develop 3-D MRI to aid in ACL surgery	37
EES gastric band, web tool may offer greater weight loss	39
E-transfer of images creates niche market for French firm	41
FDA clears FemVue device for fallopian tube evaluation.	43
GE, MIT team-up for easily accessible ultrasound technology	45

EndoBarrier offers non-surgical alternative for obesity, diabetes	47
Great Lakes NeuroTech to focus on movement disorders, R&E.	49
Halt closer to fibroid indication with FDA OK of ablation system.	51
HydroDot's StatNet brings EEG recording into the 21st century	53
Integra launches CRW Stereotactic system	55
Ib2c launches with product aimed at increasing fertility	57
IntraPace expects CE mark by year end for abiliti device.	59
IntriMed aims to address device industry challenges	61
Sticker-like heart monitor solves diagnostic limitations	63
LensAR laser system wins 510(k) for cataract surgery	65
Start-up firm mc10 aiming at combined mapping, ablation	67
Metamark hits the mark with cancer detection test	69
Who knew? Future of medical research lies in online gaming	71
NinePoint has high hopes for next generation OCT platform	73
NovaBone gains approval for MIS delivery system	75
NovaVision hopes to bring VRT technology to forefront	77
OncoSec, not your typical startup by a long shot	79
Disruptive technology makes debut at OneMedForum 2011.	81
OptiMedica receives results from Catalys clinical study.	85
Seeing opportunity, OrbiMed sets up new fund in Israel.	87
PixelOptics develops notable new alternative to bifocals	89
New pump for microneedle drug-delivery patch created.	91
Swallow enhancement device may help dysphagia sufferers	93
RadarFind's system pinpoints medical equipment's location	95
Reverse moving forward to bring products to market	97
Students spin new use for very common kitchen tool	99

Riverain software gives clearer picture for lung cancer detection.	101
AMO prosthetic arm movement fueled by signals from the brain	103
Sicel touts dose device at radiotherapeutics meeting.	105
SonarMed puts focus on prevention with AMS device.	107
SoundBite hearing aid can transmit sound via teeth	109
Researchers aim to link robotic limbs to the brain	111
Procedure makes it easier to remove pineal tumors.	113
SMI to use satellite spy technology to find cancer	115
UM group goes off on tangent to develop safer IV system.	117
FDA clears OCT imaging system for pulmonology	119
Tryton wins approval for IDE to start pivotal trial	121
Company seeks launch of radiation-free detection tool.	123
Experimental device could lead to safer chemo treatments.	125
Researchers build ‘bioreactor’ to help treat hydrocephalus.	127
Neurochip could harness brain power in restoring mobility	129
New Venrock company to launch med-tech in Brazil	131
Ventus creates solution for sleep apnea	133
Veracyte’s test to improve thyroid cancer diagnosis	135
Group launches Vivere to tackle ART procedures.	137
